

## **Our Exclusive Adhesive-Plus Program**

The Adhesive-Plus program is a preventative maintenance program that has been developed to help our customers properly maintain their hot melt application equipment.

### **Some of the major benefits of this plan are:**

- Increasing the overall life of your hot melt equipment.
- Reducing down-time.
- Reducing the cost of replacement parts and repairs.
- Increasing the overall efficiency of your packaging and/or assembly processes.

**The Adhesive-Plus program is exclusively for customers that purchase an average of at least 1,000 lbs. of adhesive per month directly from KEE-PAK, Inc.** Although it is not being implemented as a contract plan, it is understood that the Bi-yearly equipment services are to be performed to each piece of hot melt equipment, as long as the hot melt adhesive products being used in the system(s) is purchased from KEE-PAK, Inc. Hot melt equipment services will always be scheduled during normal business hours, Monday through Friday, unless otherwise stated in program details. The service schedule will start immediately with the first purchase of adhesive and on six intervals afterward.

### **With each service the following task will be performed:**

- Complete tank drain out and cleaning.
- Removal and cleaning of tank inlet screen.
- Inspection and clean out of electrical control cabinet.
- Inspection and lubrication of air motor or gear pump system.
- Inspection and clean out of air control filter / regulators.
- Complete low-temp flush of each hose and gun body.
- Replacement of tank high-pressure filter and o-ring.
- Replacement of all gun filters.
- Inspection and cleaning of all nozzles.
- Complete report on system condition, additional recommendations, and placement of dated service tag on unit.

NOTE: Service includes all labor, travel and other expenses, but does not include parts, such as replacement filter screens, nozzles, etc...Parts can be supplied buy customer or purchased from KEE-PAK, Inc. during service.
